

QuantumATK License Guide

Version: T-2022.03

Important Note

For Trial Users or Non Customers

If you are a trial user or not a customer and you wish to evaluate QuantumATK, apply for a free 30-day evaluation license on Synopsys EVAL portal: eval.synopsys.com

For Customers

If you are a customer entitled to maintenance services, you can access QuantumATK directly on SolvNetPlus: solvnetplus.synopsys.com

To run QuantumATK T-2022.03, customer must use the Synopsys Common Licensing (SCL) software, version 2018.06-SP1 or later. License key files and the latest version of SCL can be downloaded from SolvNetPlus

For more details check the links at the end of the present guide.

START QUANTUMATK

CONNECT TO A LICENSE SERVER

0

Before you move forward be sure you have the following information:

- Hostname or IP address of the license server
- The port number that the license server is listening to

For more details you can read the [License Server Installation Guides](#):

- https://docs.quantumatk.com/guides/license_server_windows.html
- https://docs.quantumatk.com/guides/license_server_linux.html
